Meeting notes

18 November 2023 (12:00 to 14:00 GMT)

OBJECTIVES AND ACTIVITIES

- Discuss general concept of what project will be
- Cover broad aspects of what we need to do for project proposal
    - E.g., requirements analysis, identifying objectives
- Identify team roles
- Get a rough idea of how much time each aspect of research and analysis will take
- Solidify how regularly we'll meet
- Overview rubric

MEETING NOTES

PROJECT IDEAS

Kurt:

- AI chat bot
- Online learning system
- Social media dashboard (concatenating all social media platforms in one space)
    - Viewing newest posts
    - Viewing latest interactions
- Expense tracker
- Online portfolio (grouping together all projects/documents to be presented)

Martin:

- AI learning style app

Carli:

- To-do list
- Student all-in-one platform (with notes, schedule manager, timer)

Final Ideas
- Online portfolio
- Social media dashboard

What make these unique is that they provide many of our typical services in one space to offer easier accessibility and efficiency for one grouping of actions

Target demographic
Online portfolio: Students, people for looking for jobs

TECHNOLOGIES
Frontend: HTML, JavaScript

Backend: Node

Database: Mongo/MySQL

Version control: Git

Presenting project on: GitHub Pages (or alternatively hosting using GoDaddy)

ROLES

Frontend: Kurt, Carli

Backend: Martin, Tan

GOING FORWARD

Tasks before next meeting
Deadline: 8:00am 25 Nov GMT+0

Kurt – Gantt chart

Martin – Trello setup, GitHub setup

Carli – Trello setup

Everyone:

- Research on context and requirement (getting a better idea of target demographic)
- Research on possible technologies/libraries/dependencies we could incorporate
- Identify context of website
- Provide possible content of website (what we are providing, stems from requirements and specifications)
- Look into rubrics (midterm and final) to get a good understanding of what we're being graded on

Next meeting goals:
Going off of the basis that we'll have a better understanding of who we're designing for and what our project will be providing, we will be:

- Developing questionnaires
- Getting into User Centered Design aspects
